

Comparative Timelines + Geography Unit

Students compare societies by layering events, routes, environments, and human choices.

LENGTH	2 weeks
GRADE	10-11
PRODUCT	Annotated map-timeline argument
MODE	Pairs + whole-class gallery

01

Compare timelines

Place regional events on shared timelines and identify overlaps, gaps, and turning points.

02

Use geography as evidence

Explain how routes, resources, climate, or distance shaped historical choices.

03

Build causal claims

Defend a comparison using map evidence, timeline evidence, and source evidence.

04

Transfer patterns

Apply one historical pattern to a new region or era without flattening context.

LEARNING SEQUENCE

1

Anchor

Compare two mystery maps and predict what might connect them.

CHECK: prior knowledge + curiosity

2

Layer

Add events, routes, resources, and environmental constraints.

CHECK: map-timeline accuracy

3

Investigate

Use source excerpts to explain why patterns appear.

CHECK: evidence notes

4

Argue

Build a claim comparing regions across shared pressures.

CHECK: claim + evidence fit

5

Transfer

Apply the pattern to a new case and revise the claim.

CHECK: reflection + revision

PICRAT ALIGNMENT

P Passive I Interactive C Creative R Replace A Amplify T Transform

Teacher mini-brief

P-R Replaces short lecture with a visual anchor.

Layered map-timeline

I-A Students manipulate layers and test relationships.

Collaborative claim board

C-A Pairs create evidence-backed comparisons.

Transfer challenge

C-T Students generate a new case comparison not possible with static notes.

EVIDENCE OF LEARNING

Formative

- Map layer exit tickets
- Peer source-check notes
- Claim conference prompts

Summative

- Annotated map-timeline
- CER comparison paragraph
- Transfer reflection

Rubric

- Accuracy of layers
- Strength of comparison
- Evidence-to-claim fit

PICRAT ALIGNMENT

P Passive I Interactive C Creative R Replace A Amplify T Transform

Teacher mini-brief	P-R Replaces short lecture with a visual anchor.
Layered map-timeline	I-A Students manipulate layers and test relationships.
Collaborative claim board	C-A Pairs create evidence-backed comparisons.
Transfer challenge	C-T Students generate a new case comparison not possible with static notes.

EVIDENCE OF LEARNING

Formative

- Map layer exit tickets
- Peer source-check notes
- Claim conference prompts

Summative

- Annotated map-timeline
- CER comparison paragraph
- Transfer reflection

Rubric

- Accuracy of layers
- Strength of comparison
- Evidence-to-claim fit

DESIGN PRINCIPLE

Move from seeing patterns → explaining patterns → transferring patterns.
