

PERSONA / SAME HISTORY CLASS

# Sofia Patel

A visual systems thinker who wants world history to click through maps, movement, climate, trade, and everyday life.

AGE

16

GRADE

10th

CONTEXT

World history + geography elective

TIME

Steady nightly review with map-heavy notes

DEVICE

Tablet for diagrams, laptop for projects

COMPARATIVE LENS

maps + movement

trade networks

environment

daily life

systems change

WANTS

- See how geography, climate, and trade shape choices over time
- Turn dense chapters into maps, flows, and visual systems
- Understand everyday life, not only rulers and wars
- Predict patterns before memorizing the names attached to them

FRICTIONS

- Loses interest when history is taught as isolated regions
- Struggles when maps appear only as static reference images
- Needs clearer links between environment and political change
- Can overfocus on diagrams and miss the human stakes

LEARNS BY

- Sketching migration, trade, disease, and idea flows
- Layering cause-effect maps across regions and centuries
- Comparing how ordinary people adapt to pressure
- Using color-coded systems before writing summaries

DESIGN FOR

- Interactive map layers that reveal causes one at a time
- Network challenges: connect goods, beliefs, people, and power
- Everyday-life snapshots tied to geography and resources
- Pattern prompts that ask: where else have we seen this?

" If I can see the system, the story finally makes sense.
